

REBOUND
ELECTRONICS (UK) LIMITED

Conflict Minerals Statement

As an AS9120 global distributor of electronic components traceability of the supply chain is Paramount to Rebound. This extends to the traceability of conflict minerals.

We firmly believe that our customers should be fully informed about the products they purchase.

As a distributor, we are not able to certify as to the country of origin of the minerals contained in the products manufactured by our suppliers, we are however committed to working with our customer base to supply products that meet the customer's specifications.

We are aware of our responsibility and will pass-on pertinent information relating to the devices that we are advised may contain these conflict materials, when communicated to us by the component manufacturers themselves or our suppliers.

Rebound fully understands the importance of this issue to its customers and is committed to supply chain initiatives and overall corporate social responsibility and sustainability efforts that work towards a conflict free supply chain.
